# Cash Acme<sup>™</sup> E3 Pressure Regulating Valve

The Cash Acme<sup>™</sup> E3 Pressure Regulating Valve automatically reduces a high inlet pressure to a lower delivery pressure and maintains the lower pressure within acceptable limits. It provides substantially higher capacity and closer regulation for more demanding and higher quality installations. The E3 incorporates a yoke-type design, allowing the regulator to close against the inlet pressure and provide quieter operation under wide and varying flow conditions.

## **Approved Applications**

Commercial and residential water and dry, filtered air applications.
